DETAILED ACTION

1. Applicant's election of claims 23-28 in the reply filed on 11/15/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 1-22 non-elected without traverse (See paper filed on 11/15/04). Accordingly, claims 1-22 been cancelled.

Reasons for Allowance

3. Claims 23-28 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose the combination of a method for producing an electronic device in the base claim 23. Specifically, the combination of the process comprising a first panel with a plurality of lead frame positions configured in row and columns, each one of the plurality of lead frame positions having at least two

semiconductor chips embedded in a material of the first panel, applying a common fine wiring structure to the plurality of active top sides and to the top side of the first panel in each of the plurality of lead frame positions; separating the first panel lead-frames; producing a rewiring plate with a plurality of device positions configured in rows and columns, configuring a plurality of bonding areas in edge regions of each of the plurality of device positions, and distributing a plurality of external contact areas on an underside of the rewiring plate in each one of the plurality of the device positions; applying a lead-frame separated from the first panel in each one of the plurality of device positions of the rewiring plate while not covering the edge regions configured with the plurality of bonding areas; producing a plurality of bonding connections between the plurality of contact pads in the edge regions of the plurality of lead-frame positions and the plurality of bonding areas in the edge regions of each one of the plurality of device positions; producing a second panel by covering the plurality of device positions with a plastic housing composition; applying a plurality of external contacts on the plurality of external contact areas of the rewiring plate; and separating the second panel into a plurality of individual electronic devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
